

# what do heavy vehicle technicians do?

With booming transport and heavy construction sectors in Australia, great opportunities and rewarding careers for people servicing, repairing and maintaining trucks and heavy equipment.

## You will learn to:

- service and maintain diesel engines and heavy vehicle components
- understand the technical workings of engines, transmissions and mechanical components
- use computerised testing equipment to diagnose faults and re-program electronics
- strip down and re-assemble engines and components
- service braking systems, trailers and hydraulics.
