

Get with the program

VACC Auto Apprenticeships is seeking to employ bright students, capable of meeting the technologically advanced demands of today's automotive industry.

In return, Auto Apprenticeships provides a smooth pathway for students wanting to enter the workforce.

We recruit the best candidates and match them to a workshop, pay for the necessary medical examination, conduct an induction program, provide an introduction to the host and place them on the VACC payroll.

We're in it for the long haul, so it doesn't end there. Trade-qualified Field Supervisors are responsible for individual apprentices. They regularly visit the apprentices in the workplace to provide ongoing mentoring and

support, while engaging with business owners and staff to ensure everything is running smoothly. If there's a problem, our Field Supervisors are there to help and remedy the situation.

The automotive industry employs 400,000 Australians

The Australian automotive industry is a \$145 billion economy

VACC is the peak automotive industry body and has nearly 100 years' experience

All apprentices are directly employed by VACC and placed with carefully selected workshops, so you know they'll be in good hands

Career Pathway

Apprenticeships are currently available for:

- motor mechanics (cars, trucks and motorcycles)
- underbody technicians (steering and suspension)
- spray painters
- tyre fitters
- panel beaters
- commercial vehicle fabricators
- auto electricians
- spare parts

School-based Apprenticeships/ Traineeships

It's the perfect way to start an automotive career while you're still in school.

Students undertaking a School-based Traineeship/Apprenticeship will generally work with host employers for one or two days a week, and on other days study for VCE or VCAL.

School-based Traineeships/Apprenticeships can be undertaken during years 10, 11 & 12 and will contribute to your VCE or VCAL results.

The Benefits

- VCAL and Certificate II in Automotive qualifications gained simultaneously
- Paid employment
- Formal training with a Registered Training Organisation
- A work history to assist in obtaining employment after leaving school
- Greater career options
- On completion of Certificate II, the opportunity to up-skill to a full trade qualification is available with VACC
- Auto Apprenticeships is the only industry peak body employer of

A large background collage featuring various automotive parts like engines, suspensions, and wheels. In the foreground, there's a circular inset showing a male and female mechanic working together on a vehicle undercarriage. Below them, another circular inset shows a close-up of a car engine. The overall theme is the technical and professional nature of the automotive industry.
